Professional Profile

I'm a junior web developer with knowledge in JavaScript, React, Node.js, and Express, focused on building dynamic and functional web applications. I have hands-on experience through personal projects, ranging from product management systems to Discord bots, applying best practices and basic UI/UX design principles. I'm looking for a part-time position where I can continue to grow as a developer, contribute to valuable projects, and learn from experienced teams.

Technical Skills

Languages: JavaScript, Basic TypeScript, Basic PHP

Frontend: HTML5, CSS3, Bootstrap, ReactJS

Backend: Node.js, Express.js

Databases: MySQL, Basic MongoDB

Tools: GitHub, Google Docs, Google Drive

Other: REST APIs, agile methodologies (Scrum)

Highlighted Projects

● School Workshop Manager

Web app that allows teachers to create and manage school workshops, and students to enroll.

GitHub: https://github.com/Reinert-Lucas/Gestion-de-Talleres-Escolares

- Product Manager & Search System

System for small businesses with user/admin roles, product search, and access control.

GitHub: https://github.com/Reinert-Lucas/gestion-productos

- Martina's Bakery

Responsive static website with SEO optimization.

GitHub: https://github.com/Reinert-Lucas/Martinas-Pasteleria

- Discord Bot - ARI

Bot for a gaming community with features like blacklist, reminders, and stats.

GitHub: https://github.com/Reinert-Lucas/ARI-BotDS

- Express/React Project (Weather & Login)

Basic login system with a weather view using external API.

GitHub: https://github.com/Reinert-Lucas/express-react-project

- CRUD with Java (VTV System)

Desktop app with CRUD features, including roles for client and inspector.

GitHub: https://github.com/Reinert-Lucas/Crud-Java
